## **DETAILED ACTION**

### ***Specification***

The substitute specification filed August 30, 2006 has been entered.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the single strength spectacle lens having a lateral tilt must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to because the text appearing in the drawings is not in English. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claim 30 is objected to because of the following informalities: After “comprises” and before “shape”, “rime” should be replaced with “rim”. Appropriate correction is required.

Claim 37 is objected to because of the following informalities: After “includes a” and before “tilt”, “later” should be replaced with “lateral”. Appropriate correction is required.

***Allowable Subject Matter***

Claims 21-38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. Although the prior art teaches a method of producing a single strength spectacle lens having a rotationally symmetrical base surface and a rotationally symmetrical aspheric or atoric prescription surface, the prior art fails to teach such a method comprising the steps of calculating and optimizing the prescription surface while taking into account at least a portion of the wearer's data and the adaptation of the dioptric effect including a lateral tilt of 10 degrees or more and having a base curve of the front surface of more than 6 diopters as claimed in independent claim 21. The prior art also fails to teach a system for producing such a spectacle lens as claimed in independent claim 37 or spectacle lens as claimed in independent claim 38.

***Conclusion***

This application is in condition for allowance except for the following formal matters:

Formal matters are as outlined above in the objections to the drawings and claims 30 and 37.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935):

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
